NAPCORE From Vision to Practice: Developing a Multimodal Community

David Schoenmaekers

Federal Public Service Mobility and Transport - Belgium

ITS Arena Session on Multimodal Mobility

ORGANISED BY:

IN COLLABORATION WITH:

HOSTED BY:

SUPPORTED BY:

First NAPCORE project – Multimodal aspects

- WG NAPs/NBs strategy for EU developments and policies : monitoring legislations relating to multimodal data (MMTIS)
- WG Multimodal Data :
 - identification of gaps and overlaps of existing standards in the multimodal ecosystem,
 - mapping of different standards for multimodal data,
 - standard update recommendations, etc.
- MaaS Ambassadors Team

NAPCORE MaaS Ambassadors

- MMTIS delegated regulation follow-up: workshops on the challenges of implementing MMTIS, MMTIS revision and the new version of MMTIS
 - ➔ Enables feedback to be gathered
 - ➔ Shows the need for a community platform
- Strategic sessions at NAPCORE mobility data days
- Build bridges with the rail sector
- Contact with multimodal stakeholders through MaaS Alliance, UITP, etc.
- Cooperation with POLIS to set up first exchange with regional and local authorities

NAPCORE Vision (June 2024)

“Working on a digital foundation for modern, data-driven and multimodal mobility across Europe facilitates and enhances the provision, accessibility and use of harmonised mobility data.

Cooperation among EU Member States on all aspects of mobility data exchange contributes to safe, sustainable and seamless mobility in Europe.”

Second NAPCORE project

Objective of the project :

"[...] to further enable seamless and efficient multimodal travel across Europe by facilitating the development and deployment of harmonized European public data standards for use in multimodal travel information services for door-to-door mobility applications."

- ➔ WG2 : Focus on multimodal mobility
- ➔ WG 4.3: Focus on multimodal standards

WG 2 – Multimodal Mobility

Goals and ambitions :
create and lead a multimodal community
inside and outside NAPCORE

- ➔ Foster engagement,
- ➔ Build relationships and trust,
- ➔ Facilitate knowledge sharing,
- ➔ Gather input and feedback.

Community management

Domain I: Multimodal Data Availability on the NAPs

Domain II: Multimodal Data (Re-Use)

+ Study « EU IDs for Multimodal Access Nodes »

NAPCORE multimodal community

Goals:

- Develop an ecosystem with relevant multimodal mobility stakeholders to discuss work ongoing, requirements and contribute to relevant activities.
- Facilitate engagement through regular communication, thematic workshops and regular update meetings.
- Organize, once a year, a Users' days/NAP users Multimodal Forum (in-person or online) for actual and potential users of NAP data in multimodal mobility applications.

➔ Close collaboration is foreseen with all Working Groups and activities

NAPCORE multimodal community

Specific topics/communities will be addressed a.o.:

- Passenger public transport (metro, trams, bus etc.),
- Rail,
- Maritime/inland waterways/navigation,
- Air/aviation,
- (e-)bicycle,
- Car-related services (like parking, car-sharing, car-pooling, etc.).
